New York State Real Estate License | Current

PROFESSIONAL EXPERIENCE

Ripe Metrics | San Diego, CA   **2021 - Present**
Front End Developer
- Converted the company's Beta platform from PHP to React with a small team of developers.
- Designed data tables, graphs, and charts to display detailed customer and product information.
- Facilitated the flow of data to the front end using APIs
- Incorporated React-Redux store (using actions, hooks, dispatch etc.) to implement a global state in the application where necessary.
- Utilized Tailwind and Tailwind UI to dynamically code the design of each required client display.

LEARN Academy | San Diego, CA   **2021**
Full Stack Developer
- Completed over 640 hours of direct coding experience, constricting code individually, through pair programming, or mob programming.
- Practiced test-driven development to create full stack applications using React and Ruby on Rails.
- Gained proficiency in building Javascript, Ruby, and React applications.
- Utilized effective communication and cooperation through pair and mob programming projects with teammates.

Nooklyn.com LLC | Brooklyn, NY   **2016 - 2020**
Licensed Real Estate Agent
Specialized in listing and assisting in the renting of residential properties. Worked independently and responsible for prioritizing all aspects of business: Customer service, records keeping, accounting, marketing, and managing deadlines.
- Advertised apartment listings for landlords.
- Established positive flow of communication with agents, clients, landlords, and all personnel involved in closing transactions;
- Educated potential clients on their rights including dual agency and fair housing.
- Facilitated the closing process on behalf of clients and landlords. Ensured that all parts of the contracts were met before closing.

United States Air Force | Various Locations   **2009 - 2016**
Air Transportation – Special Handling
Served as a logistics and operations staff Non-Commissioned Officer that ensured consistent compliance with administrative policies, procedures, safety rules, and federal regulations to meet all guidelines. Orchestrated seamless movement, organization of vehicles, personnel, freight, and cargo worldwide, determining the most efficient and economical routes to accomplish mission requirements.

- Supported program managers in researching, analyzing, and organizing information to compose briefing summaries on initiatives, projects, and action items
- Maintained and developed positive business relationships with key personnel involved in, or directly relevant to, a logistics activity
- Planned shipping dates, material pick up and loading times of equipment and material to be shipped along with documentation for material and equipment shipped
- Mentored and provided leadership, technical advice, and administrative guidance regarding programs, objectives, policies, procedures, mission analysis, course of action, problem-solving, and coordination of administrative activities
